

**QUALITY, QUANTITY, SPEED.**  
**PRODUCTION REDEFINED.**

The Canon imagePROGRAF 60" PRO-6100S and 44" PRO-4100S large-format printers are built for advanced printing solutions. With an 8-Color LUCIA PRO ink system, these printers are ideal for bringing production signage, commercial photography, and proofing businesses to the next level.

Color consistency, fast print speeds, and low running cost are why the PRO Series line of large-format printers were engineered.

#### FEATURES

- Intelligent Media Handling
- 4.3" touch screen
- Borderless printing
- 1.28" print head
- LUCIA PRO 8-color ink system
- High-speed L-COA PRO processor
- High-precision unibody design
- Multifunction Roll System (optional on the PRO-4100S)
- Multipositional basket
- High-capacity ink tanks
- Advanced software and workflow solutions
- Compact design
- Wi-Fi® connectivity
- Direct USB drive printing
- Sub-Ink Tank System

## PRODUCTION REDEFINED

Canon thought of every detail when it came to building the ultimate large-format production printer—intelligent media handling, a large 4.3" touch screen operation panel, torque control on the Take-up unit, a Sub-Ink Tank System, and a compact size to reach a whole new level of performance.

### INTELLIGENT MEDIA LOADING

For the first time ever, an imagePROGRAF printer can load and recognize paper without the need for human intervention. Simply set the roll holder in the printer and the media will automatically feed into the device. The built-in multi-sensor measures the surface reflection and the media thickness to determine the media type, without the need to manually enter it.

### REMAINING MEDIA ESTIMATION

Accurately measure the remaining media on a roll without the need to print a bar code, saving both ink and media.

### MULTIFUNCTION ROLL SYSTEM

The Canon Multifunction Roll System, standard on the PRO-6100S and optional on the PRO-4100S, can be used in two different ways—enabling a second roll of media to be loaded on the printer, or the unit can be configured as a bi-directional Take-up unit.

### SUB-INK TANK SYSTEM

The Sub-Ink Tank System acts as an ink reservoir for the printer, working to remove all the ink in the tank before having to replace it—helping eliminate any wasted ink and decreasing your cost per print! The empty tanks can then be replaced on the fly, without stopping the printer and ruining the print. This is extremely useful during your long print jobs.

Embedded innovations woven together, deliver outstanding performance each and every time.

### 1.28"-WIDE PRINT HEAD

At the heart of the imagePROGRAF PRO-6100S and PRO-4100S printers is a single 1.28"-wide print head with 18,432 nozzles. These PRO Series printers are able to produce stunning prints with less passes, making these the fastest Canon 8-color, large-format printers ever!

### LUCIA PRO INK SYSTEM

The LUCIA PRO ink set adopts microencapsulated 8-color pigment inks. These inks help you achieve fantastic color reproduction, image clarity, and fine lines, all ideal for creating vivid posters and advertising displays.

#### This ink set helps:

- Enhance red color performance
- Reduce graininess
- Enhance dark area reproduction

To enhance print performance, the 8 colors use all 12 ink channels in the

print head. The LUCIA PRO ink is arranged in a mirror layout on the print head, symmetrically arranging the colors: C, M, Y, and MBK. This layout allows for the same ejection order of the four key colors during the bi-directional printing process, resulting in faster print speeds.

### ANTI-CLOGGING TECHNOLOGY

The PF-10 print head with FINE technology generates fast print speeds and helps reduce the possibility of clogging, so ink and media aren't wasted. Ink ejection conditions are precisely checked by sensors to ensure optimal performance. If a clog is detected, another nozzle will automatically provide backup, helping to reduce the possibility of a misprint.

#### **COLOR CALIBRATION**

Producing the correct color is paramount when printing high-quality work. The built-in Color Calibration function uses a multi-sensor to read color density and to calibrate the printer, so that the last print can look identical to the first.

Need color consistency in different locations? The PRO Series gives you the ability to calibrate up to 50 printers across the world with the single click of a button.

#### **L-COA PRO IMAGE PROCESSOR**

Big jobs need fast processing. This high-precision control engine performs the high-speed processing of massive amounts of image data, generates the printing data, and controls the optimal ink layout for achieving faster print speeds.

#### **UNIBODY DESIGN**

The unibody structure was designed to provide a strong platform for stable print head scanning, resulting in precise ink droplet placement. The ultimate combination of speed and high-quality printing is achieved with this design.

#### **BORDERLESS PRINTING**

Print borderless on all paper sizes.

#### **TRANSPARENT DESIGN**

Easily check whether printing has begun and what paper size is loaded in the printer with the all new transparent media cover.

## INPUT AND OUTPUT VERSATILITY

Canon-developed hardware and software innovations offer unique flexibility in any production environment.

### Wi-Fi® CONNECTIVITY

Stay Connected. Wi-Fi connectivity is standard with the imagePROGRAF PRO Series.

### OPERATION PANEL

The large 4.3" LCD operation-panel utilizes smart phone touch screen technology for easy operation. The top three most-used commands—Load, Feed, and Cut—now have their own buttons below the operation panel for ease of use.

### DIRECT USB DRIVE PRINTING

PDF and JPEG files can be directly printed on the imagePROGRAF PRO Series from a USB thumb drive. Simply input the thumb drive into the USB port on the printer, preview the image on the operation panel, and print! Fast and easy printing without the use of a computer.

### MULTIPOSITIONAL BASKET

The PRO Series printers offer choices on how prints will be outputted based on the type and quantity being produced. Each comes standard with a multipositional basket that can be configured as any of the following:

- Catch basket
- Flatbed stacker
- Slope (used to display a print)

## PRINTER MANAGEMENT SOLUTIONS

### PROFESSIONAL PRINT & LAYOUT

Canon's Professional Print & Layout (PPL) software for imagePROGRAF PRO Series printers offers features that streamline your printing workflow.

#### Features include:

- Can be used as stand-alone RIP or as export module in Adobe® Photoshop®, Adobe Lightroom, or Canon Digital Photo Professional
- Create and save custom layouts
- Preview of multiple images at the bottom of the software
- 16-bit printing workflow
- Auto nesting

### ACCOUNTING MANAGER

In today's printing environment, it's more important than ever to understand how much ink and media each print job is costing your business. Both Mac® and Microsoft® compatible, Accounting Manager serves as a powerful feature to accurately manage print costs. You can now track the amount of ink and paper being consumed for large-format printing for up to 50 printers!

### QUICK UTILITY TOOLBOX

Quick Utility Toolbox is home to all the Canon PRO Series printer software and tools.

### DEVICE MANAGEMENT CONSOLE

The Device Management Console software, ideal for fleet management, lets you perform color calibrations remotely. You can monitor the printer status of up to 50 units from any location in the world, be notified via e-mail when an error has occurred, or check the amount of ink left in the printers—without ever having to leave the comfort of your desk.

### ADDITIONAL SOFTWARE AVAILABLE

- Free Layout Plus
- PosterArtist Lite
- Media Configuration Tool
- Direct Print & Share
- PosterArtist (optional)
